DETAILED ACTION

Election/Restrictions

1. Claims 9-11,13-17,19-21,23-77 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 09/28/2006.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "formed corner", "unitary flange", and "encapsulated rim" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New

Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-8, 18 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Thompson (USPN 4,183,435).
6. With respect to claim 1, Thompson shows at least one sidewall (18), a top edge (between elements (18)&(20)), a bottom surface (12), a formed corner (22), with a top edge, a unitary flange (20) and an encapsulated rim (the outermost edge).
7. With respect to claim 2, Thompson discloses plastic (col. 2 ln. 40-50).
8. With respect to claim 3, Thompson shows polyester (col. 2 ln. 51).
9. With respect to claim 4, Thompson shows the encapsulated rim (the outermost edge) creates a hermetic seal with the flange (20).
10. With respect to claim 5, Thompson shows injection molding (fig. 3) for the entire container.

Art Unit: 3781

11. With respect to claim 6, Thompson shows a film (26).
12. With respect to claim 7, Thompson shows the combination of the film (26) and the encapsulated rim (the outermost edge) forms a hermetic seal (fig. 2).
13. With respect to claim 8, Thompson discloses plastic (col. 2 ln. 40-50).
14. With respect to claim 18, Thompson shows an interior coating (26).
15. With respect to claim 22, Thompson shows a waterproof injection molded coating (26) covering the interior and exterior of the tray (10)

Claim Rejections - 35 USC § 103

16. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

17. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thompson.

Thompson discloses the invention substantially as claimed. However Thompson does not disclose the tray is formed of fiberboard capable of withstanding 425 degrees Fahrenheit.

It is well known in the prior art to use fiberboard in the same field of endeavor for the purpose of preserving quality, cost reduction.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use fiberboard in order to preserve quality.

Art Unit: 3781

It has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.
